– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 5, and 8 – 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Funk et al. (US 6,681,176 B2).

Regarding claims 1, 3, 5, and 8 - 11, Funk teaches a navigation device (30) comprising a GPS receiver (not explicitly shown; note however col. 3, lines 7 – 9 and 54 – 56 at least), a memory (not explicitly shown) for storing data including data representative of a desired destination (col. 3, lines 10-11; col. 4, lines 1 - 26 at least); a processor (not explicitly shown) coupled with an input (12), a display (11), the GPS receiver and the memory and operable for calculating a location of the device and for calculating a route to navigate to the desired destination (abstract; summary; col. 6, lines 4 – 13 at least); a speaker (not shown) coupled with the processor for providing audio instruction to navigate along the route to the desired destination (col. 5, lines 17 – 35 at least); and a portable handheld housing (30/42) for housing the receiver, the memory, the processor, and the speaker (col. 3, lines 7 – 11 and col. 5, lines 17 – 35).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3661

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 6 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Funk et al. ('176 B2) as applied to claim 1 above, and further in view of Funk (US 6,650,997 B2).

As discussed above, Funk et al. ('176) teaches all of the limitations except for the inclusion of keypad and microphone (cl. 4) and communication with a remote server (cl. 6 and 12).

However, Funk ('997) teaches, in the same field of endeavor of navigation, the inclusion of a keypad and a microphone (col. 1: 35 – 42; col. 3: 47 – 49 at least) and communication with a remote server (see fig. 1 – top).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the teaching of Funk ('176) by including a keypad, a microphone and communication with a remote server as evidenced by Funk ('997) in order to enhance capabilities of the device.

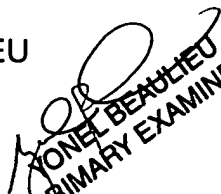

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yonel Beaulieu whose telephone number is (703) 305-4072. The examiner can normally be reached on M-R, from 0900-1600.
